PROFESSIONAL PROFILE

Technical footwear designer and pattern engineer with more than 15 years of experience in the footwear industry, specializing in transforming global concepts into high-volume local production. Expertise in process optimization through custom tools (JSX scripting) and Artificial Intelligence integration for hyper-realistic 3D visualization. Proven track record managing international collections and improving operational efficiency in pattern engineering and costing.

TECHNICAL SKILLS

- Design & Pattern Engineering: Shoemaster (Creative & Power), Adobe Illustrator, Photoshop, InDesign, Blender (3D footwear design).
- Automation & AI: JSX scripting for Illustrator (material consumption and waste calculation), AI-powered catalog rendering, rapid 3D prototyping from 2D sketches.
- Production Management: Interpretation of global specification sheets, material sourcing and selection, technical production guides, pattern engineering and grading.
- Languages: Spanish (Native), English (95% – Professional Working Proficiency).

PROFESSIONAL EXPERIENCE

Bata Shoes | Collection Development & Technical Pattern Engineering Specialist | 2017–Present

- Lead the interpretation of global sketches and specification sheets for adaptation to local manufacturing capabilities.
- Developed an automated Adobe Illustrator JSX system to accurately calculate material consumption and waste by component, significantly improving costing accuracy.
- Implemented AI workflows to generate hyper-realistic prototypes from sketches, reducing catalog presentation and decision-making time.
- Create professional pre-production guides, validate materials with the Sourcing team, and supervise stitching trials and physical prototypes.

Disney Collection Coordinator | 2016–2017

- Coordinated the creative and technical development of the Disney footwear line, aligning international brand standards with local production.
- Worked directly with suppliers to ensure demand fulfillment and quality standards.

Creative & Technical Pattern Engineer / Graphic Designer | 2008–2016

- Developed footwear collections from concept through final prototype.
- Designed technical patterns and soles using Think 3-D software to support efficient production.

ACHIEVEMENTS

- Winner of the "Your Ideas Matter" Innovation Award for process improvements in costing efficiency.
- Performance Rating: "Excellent" (97/100).

EDUCATION & TRAINING

- Internal Trainer Program – Bata (2013)
- Think 3-D Pattern & Sole Design (2011)
- Shoemaster Creative & Power CAD/CAM Design (2009)
